

GREEN TECHNOLOGY SOLUTION

REDUCTION OF CO2 EXHAUST AND PM FOR THE ENVIRONMENT PROTECTION FOR SHIPPING INDUSTRY

The shipping industry is facing ever greater challenges due to the recession in the world economy. Even when the global economy recovers, fuel prices are expected to rise due to shortages of fossil fuel oils. The shipping community is experiencing stricter limitations on pollution (SOx, NOx, PM), and considerable pressure to accept its share of the required reductions of greenhouse gas emissions (GHG). More knowledge will be essential if we are to meet these challenges.

Asia Network Japan with the support from Malaysia Shipowner's Association is organising a seminar to discuss a new emerging technology solution for the shipping of the future from Japan.. The main focus will be on how this green technology Lubricon can be addressed on energy systems, technical systems and cost saving operations.

In order to meet the future challenges within a wide range of marine technologies, Asia Network Japan has just commenced concept development for its next-generation maritime competence solution.

PROGRAM AGENDA

| | |
|-------------------|---|
| 8.30am - 9.00am | Registration |
| 9.00am - 9.15am | Welcoming Note by En. Nordin Mat Yusoff ,Chairman of Malaysia Shipowners' Association |
| 9.15am - 9.30am | Opening Remark by Prof. Dr. Nor Aieni Hj. Mokhtar, Director of National Oceanography Division, Ministry of Science ,Technology and Innovation |
| 9.30am - 10.00am | Refreshment |
| 10.00am -10.45am | New emerging Technology with Green emissions - LUBRICON-112 |
| 10.45am - 11.30am | Holistic Technical Data coordinated optimization for shipping |
| 11.30am - 12.15pm | Cost Simulation : Return of Investment |
| 12.15pm- 2.00pm | Q & A / Luncheon |

**FREE
SEMINAR**

WHO IS THIS SEMINAR FOR, WHO WILL BENEFIT THE MOST?

Decision makers in marine related companies, covering details on ship operators, managers, charterers, marine equipment companies, shipbuilders & repairers, engine builders & repairers, towage & salvage, offshore supply, dredging contractors, marine computing, ship finance, marine insurance, P&I associations, maritime lawyers, ship brokers, maritime organisations, classification societies, consultants & surveyors, maritime schools, port authorities and port operators.
